ABSTRACT

- Shop for home is a popular ecommerce website which fulfill the availability of household needs where consumers can directly buy products over the internet without an intermediate service.
- This website provides interactive interface through which a user can interact with different areas of application easily.
- Users can login to the website to shop the products and it has different categories, cart options, discount coupons and make order option.

INTRODUCTION

- This project Shop For Home has been developed in Angular, Java Spring Boot and MySql.
- The Shop For Home project is an application which is based on managing the furniture items and sell the furniture items online.
- The main purpose for developing this project in Angular and Java Spring Boot is to manage all the details about furniture item, furniture item category, company, order, sales etc.

FUNCTIONALITIES

- There are two functionalities available in this project. First one is User and second one is Admin . Admin can add furniture item category and can also manage the sales details.
- This Angular project very helpful for maintaining the sales activity in furniture item. In this
- Project customer can see the details of furniture item category etc.
- Only Admin can edit or delete the details of furniture item.

USER FUNCTIONALITIES:

- As a user I should be able to login and register into the application.
- As a user I should be able to see the products in different categories.
- As a user I should be able to sort the products.
- As a user I should be able to add the products into the shopping cart.
- As a user I should be able to increase or decrease the quantity added in the cart.
- As a user I should be able to add “n” number of products in the cart.
- As a user I should be able to get the Wishlist option where I can add those products which I want but don't want to order now .
- As a user I should get different discount coupon.

ADMIN FUNCTIONALITIES

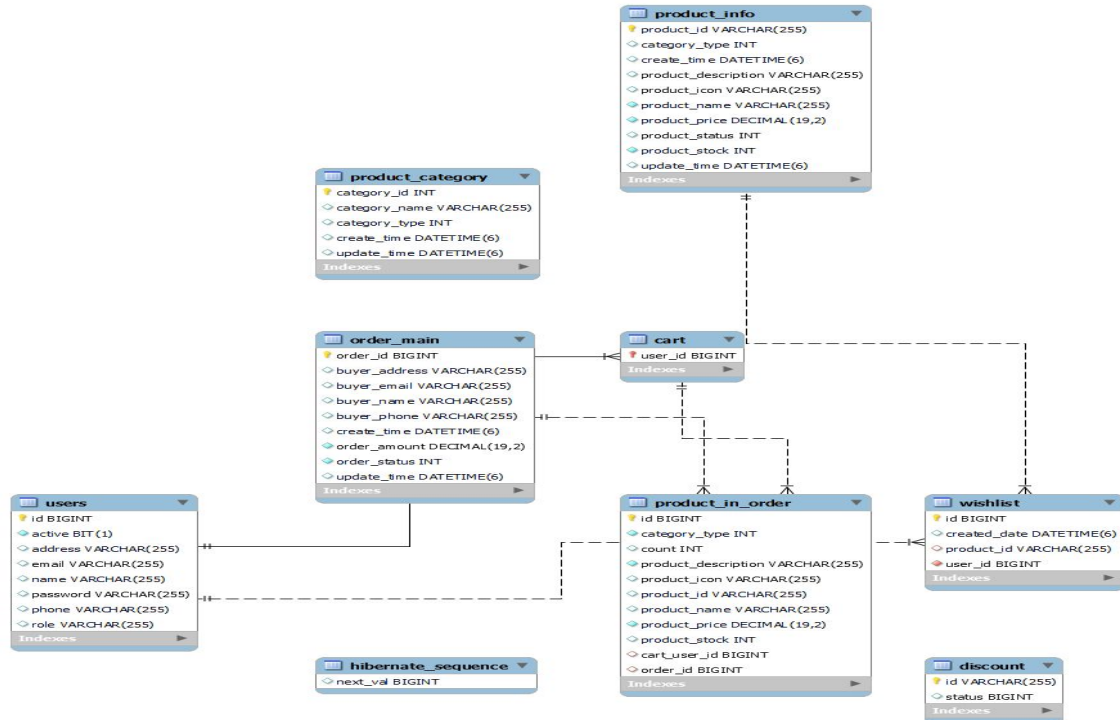

- As a admin I should be able to login, logout and register into the application.
- As a admin I should be able to perform CRUD on Users.
- As an Admin I should be able to get bulk upload option to upload a csv products details
- As a Admin I should be able to get the stocks.
- As a admin I should be able to get the sales report of a specific duration.
- As a admin I should be able to set of users.

S3 BUCKET

The screenshot displays the Amazon S3 console interface. The top navigation bar includes the AWS logo, a search bar, and the user's profile. The left sidebar lists various S3 services and features. The main content area features a large heading 'Amazon S3' with a subheading 'Store and retrieve any amount of data from anywhere'. A prominent orange 'Create bucket' button is visible. Below this, there is a 'How it works' section with a video player showing an 'Introduction to Amazon S3' video. To the right, there are sections for 'Pricing' and 'Resources'. The bottom of the screen shows a Windows taskbar with various application icons and system information.

Amazon S3

Storage

Amazon S3

Store and retrieve any amount of data from anywhere

Amazon S3 is an object storage service that offers industry-leading scalability, data availability, security, and performance.

Create a bucket

Every object in S3 is stored in a bucket. To upload files and folders to S3, you'll need to create a bucket where the objects will be stored.

[Create bucket](#)

How it works

Introduction to Amazon S3

[Copy link](#)

Pricing

With S3, there are no minimum fees. You only pay for what you use. Prices are based on the location of your S3 bucket.

Estimate your monthly bill using the [AWS Simple Monthly Calculator](#)

CREATION OF EC2 INSTANCE

The screenshot shows the AWS Management Console for the EC2 service in the us-east-1 region. The interface includes a sidebar with navigation links, a main content area with resource counts and launch options, and a right-hand panel with account attributes and explore AWS sections.

Resources

You are using the following Amazon EC2 resources in the US East (N. Virginia) Region:

Instances (running)	7	Dedicated Hosts	0	Elastic IPs	0
Instances	7	Key pairs	5	Load balancers	1
Placement groups	0	Security groups	8	Snapshots	0
Volumes	7				

Launch instance

To get started, launch an Amazon EC2 instance, which is a virtual server in the cloud.

[Launch instance](#) [Migrate a server](#)

Note: Your instances will launch in the US East (N. Virginia) Region.

Service health

Region: US East (N. Virginia)

Status: ✔ This service is operating normally

MYSQL INSTANCE

The screenshot displays the AWS Management Console interface. At the top, there's a navigation bar with the AWS logo, a search bar, and the current region (N. Virginia) and account ID. Below this, a sidebar on the left lists various services and navigation options. The main content area shows a list of EC2 instances under the heading 'Instances (1/7) Info'. One instance, 'MYSQL Instance', is selected and highlighted. Below the list, a detailed view of this instance is shown, including its ID, state, type, and various addresses.

Instances (1/7) Info

Creation of Application Frontend Instance

The screenshot shows the AWS Management Console interface for the 'us-east-1' region. The left sidebar contains navigation options like 'EC2 Dashboard', 'Events', 'Tags', 'Limits', 'Instances', 'Instance Types', 'Launch Templates', 'Spot Requests', 'Savings Plans', 'Reserved Instances', 'Dedicated Hosts', 'Scheduled Instances', 'Capacity Reservations', 'Images', 'AMI Catalog', and 'Elastic Block Store'. The main content area displays a list of EC2 instances. The instance 'Application_Frontend' with ID 'i-0a9f97037fc816527' is selected. The right-hand pane shows the details for this instance, including its state (Running), type (t2.micro), and various network and DNS settings.

Name	Instance ID	Instance state	Instance type	Status check	Alarm status	Availability Zone	Public IPv4 D...
Application_Fr...	i-04d8d6a7af9c7fcf6	Running	t2.micro	Initializing	No alarms	us-east-1e	ec2-100-25-11
Application_Fr...	i-0d068302ce10dc37a	Running	t2.micro	Initializing	No alarms	us-east-1e	ec2-18-234-80
Application_Fr...	i-0a9f97037fc816527	Running	t2.micro	Initializing	No alarms	us-east-1e	ec2-34-232-67
Application_B...	i-0884874ec63f053e0	Running	t2.micro	2/2 checks passed	No alarms	us-east-1b	ec2-23-22-152
MYSQL Instance	i-0a4d3022972fd37ee	Running	t2.micro	2/2 checks passed	No alarms	us-east-1b	-

Instance: i-0a9f97037fc816527 (Application_Frontend)

```

Creation of Target Groups

The screenshot displays the AWS Management Console interface for the 'us-east-1' region. The left-hand navigation pane shows various services, with 'Network & Security' and 'Load Balancing' expanded. The 'Target Groups' link under 'Load Balancing' is highlighted. The main content area shows the 'EC2 > Target groups' page. A table lists the existing target groups, with one entry named 'Shopforhome' having an ARN of 'arn:aws:elasticloadbalancing:us-east-1:839068719248:targetgroup/Shopforhome/5b1c3e0693cca3e7'. The 'Shopforhome' target group is selected, and its details are shown in a modal window. The details include the target type 'Instance', protocol 'HTTP', port '80', and VPC 'vpc-0c5465a694238e269'. The 'Targets' tab is active, showing a list of targets with columns for 'Total targets', 'Healthy', 'Unhealthy', 'Unused', 'Initial', and 'Draining'. The bottom of the screen shows the Windows taskbar with various application icons and the system clock indicating 20:43 on 06-09-2022.
